

Matvey Ryabchikov

Full Stack Developer

🌐 matvey.dev  github.com/matriv  orlition@gmail.com

Technical Skills

Programming Languages:  TypeScript,  JavaScript,  Rust.

Frontend Development:  React,  Vue,  Svelte/Kit,  Solid,  HTMX,  Tailwind CSS,
 Tanstack Start / Query,  Next.js,  Astro,  React Native & Expo,  Electron,  Tauri.

JS/TS ecosystem:  Hono,  AI SDK,  Drizzle,  tRPC,  Cloudflare Workers,  Convex.

Work Experience

Freelance Web Developer

2018 - 2021

Delivered high-quality services, managed end-to-end web development projects for clients from all over the world online freelance marketplaces (mostly Fiverr).

Full Stack Developer

2021 - 2022

Company: SPWorlds // One of the biggest Minecraft Server Networks in Russia

Led a small team developing and maintaining an interactive web application. Moved the project through breaking changes. Designed a public API and an npm library. Worked with TypeScript, SvelteKit, Tailwind.

Full Stack Developer

2022 - 2023

Company: Vmeste // A startup with a mission to connect Russians living abroad

Migrated an old node.js + React codebase to a modern stack (TypeScript, Next.js, tRPC, Tailwind CSS).

Rapidly delivered new features to both backend and frontend. Convinced the team to switch to Tailwind.

Senior Full Stack Developer

2023 - Present

Company: Finally Founding // Dev Agency developing applications powered by AI

Delivered multiple unique projects. Successfully integrated AI into existing projects. In three years removed more code than added. Worked with React, Next.js, Convex, Tanstack Start, Tailwind, React Native. Became an expert in building good ai-powered user experiences.

Open-Source Projects

I'm a frequent open-source contributor. List of projects I've contributed to includes [create-t3-app](#), [pop shell gnome extension](#), [Aurora Linux](#), [Next.js](#), [OpenCode](#). I'm a member in the [e18e](#) (Ecosystem Performance) community, I helped write [codemods](#) to cleanup the npm ecosystem.

You can also check out my solo projects I made for fun:

- [In browser OS simulator](#)
- [Linux music player and library manager](#)
- [Minecraft modpack bundler](#)
